EDUCATION BACKGROUND

University of California San Diego (UCSD), USA

09/2025 - 07/2027

MS EC93 Machine Learning and Data Science

Xi'an Jiao Tong Liverpool University (XJTLU), China

09/2021 - 07/2025

BSc Information and Computing Science

PUBLICATIONS (* means co-first author)

[1] Jianyou Wang*, Youze Zheng*, Longtian Bao*, **Hanyuan Zhang***, Qirui Zheng, Yuhao Chen, Yang Zhang, Matthew Feng, Maxim Khan, Aditya K Sehgal, Christopher D. Rosin, Mohan Paturi, Umber Dube, Leon Bergen. *CT Open: An Open-Access, Uncontaminated, Live Platform for the Open Challenge of Clinical Trial Outcome Prediction*. In *Conference on Language Modeling (COLM)*, 2026 [\[Link to paper\]](#)

[2] Wen Sheng, Jun Zhao, Zhengdi Sima, Jiajun Liu, Han Lu, **Hanyuan Zhang**, Zhong Zheng, Zhihong Zhang, and Daoping Zhu. *Advancing Pharmacological Treatment Effectiveness with Dual-Encoder Model in Plain Scan Liver Tumors*. In *Indian Journal of Pharmaceutical Sciences*, 2024 [\[Link to paper\]](#)

Manuscript in Preparation

Rosin, Umber Dube, Mohan Paturi. *DeepImagine: Clinical Trial Outcome Prediction via Stepwise Local Counterfactual Imaginations*. *Archive* 2026 [\[Link to paper\]](#)

RESEARCH EXPERIENCES

Laboratory for Emerging Intelligence (LEI), UC San Diego

10/2025-Present

Research Assistant, Advisor: prof. Ramamohan Paturi, Professor

Scientific knowledge graphs: Research Map. 04/2026-present [1]

- Built a large-scale LLM pipeline that parses 311K+ PMC review articles (covering 40M+ primary papers) into ~1.9M question-level research narratives, linked into a multi-million-edge, LLM-verified knowledge graph of biomedical research.
- + Use this knowledge graphs to find an evolutionary path of medical research, and make LLM take advantage of it to predict future biomedical research development.

CT Open: Live Clinical Trial Outcome Prediction Benchmark. (COLM 2026, co-first authors) [2]

Advisor: Ramamohan Paturi, Professor, Department of Computer Science and Engineering, UCSD

- Co-developed a live, contamination-resistant benchmark for predicting clinical-trial outcomes before public release.
- Built quarterly data curation, decontamination, verification, submission, and leaderboard pipelines.
- Released 7,292 trials/15,444 questions with 98%+ decontamination and 99% answer accuracy; accepted at COLM 2026.

DeepImagine: Counterfactual Clinical Trial Outcome Prediction. (Archive 2026, Under review in NeurIPS 2026) [3]

Advisor: Ramamohan Paturi, Professor, Department of Computer Science and Engineering, UCSD

- Contributed to a stepwise method that adapts matched historical trials one experimental factor at a time.
- Evaluated seven-anchor counterfactual reasoning against RAG baselines for trial-outcome prediction.
- Improved GPT-5 macro-F1 from 72.4 to 80.8; manuscript under review at NeurIPS 2026.

Zhu's Laboratory, XJTLU

01/2023-03/2024

Research Assistant, Advisor: prof. Xiaohui Zhu

Non-Contrast Liver Tumor Segmentation.[1]

- Conducted non-contrast 3D liver-tumor segmentation on 40 PSLT volumes comprising 10,923 CT slices.
- Implemented YNetr, a wavelet-guided dual-encoder 3D Transformer, in PyTorch/MONAI.
- Achieved 62.63% Dice, 1.22 points above the strongest baseline; co-authored an IJPS 2024 paper.

WORK EXPERIENCES

Shandong Inspur Innovation and Entrepreneurship Technology Co., Ltd., Jinan, China

06/2025 - 09/2025

AI Intern

- Built a ResNet18 item-recognition system for China Petroleum inventory operations.
- Developed BERT-based NER and relation-extraction models for a Qianwen-assisted knowledge graph.
- Achieved 92% item-classification, 78% NER, and 75% relation-extraction accuracy.

Suzhou Kaixide Information Technology Co., Ltd., Suzhou, China

06/2023 - 08/2023

Data Scientist Intern

- Developed and deployed an education evaluation system for large-scale student-performance analysis.
- Built Spring Boot data services and compared HMM, KNN, and DBN prediction models.
- Improved data-interaction efficiency by 30%; achieved 93.5% accuracy, 1,215 records/s, and 99.9% stability.

Shandong Health Big Data Management Center, Jinan, China

01/2022 - 03/2022

Health Data Scientist Intern

- Analyzed real-world adolescent health and biometric data from Shandong Province.
- Applied data cleaning and PCA, then compared tree-based, SVM, and ensemble models.
- Achieved 0.91 accuracy and identified BMI and sleep quality as the leading health-risk predictors.

EXTRACURRICULAR EXPERIENCES

The University of Hong Kong Summer Institute

07/2024

- Completed hands-on coursework in computer vision, large language models, and embodied AI.

Team Leader | CPI Forecasting with RNN/LSTM | 'Gauss Cup' Mathematical Modeling Challenge

06/2022

- Led a three-member team to build a CPI forecasting pipeline from public historical data.
- Engineered time-series features and trained RNN/LSTM models with regularization and early stopping.
- Delivered visual analyses, model evaluation, and a report on societal impact.

AWARDS AND HONORS

-
- The 2nd Prize | "Gauss Cup" China Collegiate Mathematical Modeling Challenge

06/2022

SKILLS

Programming Languages and Tool: Java | Python | C# | SQL | MATLAB | Neo4j | Excel | Power BI | Word | PowerPoint

Libraries: NumPy | SciPy | Pandas | PyTorch | Scikit-Learn | Matplotlib | OpenCV

Language: Chinese (Native language) | English (Fluent, TOEFL scores:105)
